

Lock Down Your Linux

Open Source Security Expertise from Wind River Professional Services

Companies creating secure infrastructure systems are demanding increasing levels of high assurance and availability. Managing cost objectives while supporting security and robustness requirements is a challenge that makes Linux an attractive option, and Wind River's expertise and professional services combined with Wind River Linux products offer a compelling solution.

Secure Embedded System Expertise

Wind River Professional Services can help suppliers leverage the power of open source Linux and reduce the time it takes to build high-assurance-compliant systems. Our extensive experience in Linux and secure embedded systems offers a wide range of advantages:

- Reviews and advice on security requirements, including OSPP, EAL4+, and FIPS 140-2
- Accelerated new and modified Linux platform certifications as a result of Wind River's extensive certification competency and security agency experience
- Planning, design, integration, migration, and optimization services tailored for secure platforms
- Expanded reuse with migration of legacy components into highly secure platforms

Packaged Professional Services

Our industry experts use advanced tools and best practices to produce fully documented high-value deliverables with every engagement. Take your product to the next level with these solutions:

- Platform certification services: EAL4+, FIPS 140-2, ISO/IEC
- Wind River Linux Secure architecture study and platform porting
- Certified multi-core, multi-OS platform architecture and implementation services
- Android and Linux graphics consulting

Why Wind River Works

With more than 30 years of experience in embedded systems innovations, Wind River delivers high-quality products and services that help our customers gain rapid returns on their investments:

- Reduce time and expense in designing and certifying platforms for EAL4+ security requirements.
- Reuse your legacy software and systems on next-generation secure platforms.
- Expand your technical resources with Wind River experts collaborating onsite with your team.
- Produce on-time, on-budget deliverables with our CMMI Level 3+ best practices and processes.
