

SHARE YOUR INNOVATIVE IDEAS

WIND RIVER TECHNICAL SYMPOSIUM
CALL FOR PRESENTATIONS

Are you excited about technology? Have something to share with the Wind River® technical community? Step up and present at the Wind River Technical Symposium.

This monthly event is hosted by the Wind River engineering community, with folks just like you presenting the technical content that makes Wind River go.

We are looking for presentations running 30–45 minutes, targeted directly at the engineering and technical communities. Geeky stuff is encouraged! Working on an exciting project with Wind River? Have you contributed some open source code that you are particularly thrilled about? Are you good at reading the future and want to share your view? Want to share a cool tool or process that might be useful for others? Join us!

Here are a few example topics to spark your creativity:

- Technology trends (robotics, security, application frameworks, new open source tools, IoT, cloud, ML/AI, autonomous cars, DevOps, security, block chain, etc.)
- Stories about how Wind River products or services have transformed your company
- Program management methodologies
- Customer success or lesson learned stories
- Tools or tricks you are employing in software development
- Maker projects that you think would be interesting to others

If you're interested in taking part or have any questions, please drop us a line at innovation@windriver.com.

HOW TO SUBMIT YOUR PRESENTATION

- Write an abstract in a readable format (email, PDF, Word, etc.). Make it clear and concise — no more than two paragraphs.
- Give it an interesting title, list the intended presenters along with their work locations and titles, and indicate whether it will be in English or another language.
- Tell us who suggested that you present.
- Let us know how long your presentation will be.
- Email all of the above information to innovation@windriver.com.
