

WIND RIVER MENTORING

Wind River® Mentoring is assistance and coaching delivered by industry-experienced engineers to help you integrate Wind River solutions into your environment. When you choose Wind River Mentoring, we consult with you to understand the challenges that your team is facing, so each session is tailored to your specific needs. Our subject-matter experts work with you to formulate a plan that considers tools integration, technology deployment, and development workflow, while also taking into account industry best practices, trade-offs, and future maintenance costs.

We focus on increasing the skills of your team, improving productivity, and accelerating adoption of solutions while reducing risks. Customers have used Wind River Mentoring in the following ways:

- Product installation, configuration, and licensing
- Tools usage best practices
- Development workflow analysis and best practices
- Technology whiteboard discussions
- Project design and planning, including deployment and remote support
- Debugging assistance
- Optimization trade-offs and best practices

BENEFITS

- Increase productivity
 - Ensure developers are using tools and technology efficiently.
 - Remove productivity obstacles early.
 - Avoid trial-and-error cycles for solutions that are already available.
 - Provide workflow reference material for new developers or infrequent users.
- Reduce risk
 - Ensure technology is being applied optimally.

- Catch problems early, before they impact other parts of a project.
- Get help from a subject-matter expert who understands your project environment and history and can offer the most appropriate assistance quickly and proactively.
- Eliminate high overhead associated with escalations.

DELIVERY

Mentoring is available in person and remotely. You can arrange for a regular schedule of check-ins with an industry-experienced engineer, ensuring that you address your team's questions early, before precious development time is wasted.

EXPERTISE

Whether your concerns are centered on system architecture, migration strategy, or performance optimization, with Wind River Mentoring you can leverage our experience across many projects and give your team a running start. Our engineering specialists have years of experience in your industry. We take into account the existing expertise and skill sets of your team to tailor the engagement specifically to your needs. Each session is relevant to the project at hand, making the most of your team's time.

Wind River is the one company that puts it all together for you: industry-standard platforms, industry-leading products, lifecycle tools and support, best-in-class partnerships, industry best practices, and world-class education services.
